

**HITEC SPRAY TRUCKING ON AT
THE NATIONAL PAINTING & DECORATING SHOW
10-12 November 2008 at the RICHO STADIUM**

At this year's National Paint & Decorating Show, surface coating technology specialists, Hi-Tec Spray Ltd.(HSL), will be rolling out their truck once again, on **Stand No. 30**.

Featured on the truck will be the latest models from GRACO's range of airless spray equipment including the Power Series range of sprayers, notably the Ultra[®]Max II Electronic airless sprayers, the ST Max sprayers, Turbine units and the GMax petrol unit. But most especially, GRACO's latest addition to the range of textured sprayers – the revolutionary T-Max 657 – will be given a high profile among the products on the stand.

In association with HSL and with the T-Max 657 in mind, Wet and Dry Wall Ltd. will be giving practical demonstrations in the application of sprayable and multi-finish plasters for painters and decorators wishing to enhance their professional skills and extend this additional service to their clients.

HSL's familiar Rolling Wall has been incorporated into the truck so visitors will still be able to roll up their sleeves and get some "hands-on" experience in the use of some of the finest surface coatings technology in the business. On hand will be personnel from GRACO, HSL and Wet and Dry to give tips, advice and answer any questions.

The continued success of the "On-stand spray equipment SPECIAL OFFERS" featured at previous shows has proven too successful to keep under wraps so visitors will have the chance to buy GRACO equipment at attractively discounted rates once again.

Visitors to the stand will be offered the opportunity to enter a daily, free prize draw by simply dropping a business card into a hat.
