

More diary dates are scheduled for 2009 after end-users demand more “Spray Day Events” from Hi-Tec Spray Ltd.

Due to the unprecedented success of last year’s “Spray Day” events, surface coatings specialist, Hi-Tec Spray Ltd (HSL) will be doing it all again during 2009, in conjunction with West Midlands based Intercoat Industrial Paints Ltd. who manufacture and distribute polyurethane coatings and catalyst hardeners in the UK.

The Maidstone Depot has already hosted the first of the new series of “Spray Days” and will be followed by the Stowmarket Depot (28-29 Jan) then the Southampton Depot (25- 26 Feb). It is anticipated that “Spray days” will be held throughout the year at various depots around the UK where HSL’s 2-pack polyurethane spray system technology will be demonstrated to the medium to high volume users in the furniture and joinery industry.

HSL’s pump has the advanced feature of mixing clear, top and base coats or full pigments automatically with the catalyst hardener at a consistent ratio of 2:1, delivering a quality mix every time and only on demand. As the mix occurs outside the main supply source, product only in transit to the gun (barely 200ml) is discarded when flushed through by solvent at the simple flick of a lever.

As well as enabling a quick product changeover from coat-to-coat, without catalyst loss, the technology even allows the user to take a lunch break as it takes less than 2 minutes to flush and less than 2 minutes to prime!

The pump also employs the more sophisticated Air Mix technology rather than air spray which gives greater transfer efficiency with less waste, outstanding finish and a quick pay-back cycle.

Hi-Tec Spray Ltd. supply more than application equipment and plant in isolation. They also develop a partnership with their clients to design and develop turnkey systems, where, on the one hand – individual components work well independently, and on the other – collectively fit together like a glove. They are one of few companies able to pull both sides of the industry together to deliver that total, professional solution
